Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4,5, rejected under 35 U.S.C. 102(b) as being anticipated by Manor et al.-5,807,161.

Manor discloses a pad for attaching an abrasive article to a sanding tool comprising a supporting layer having a backing material (17) surrounded by a moisture barrier (12), a hook type attachment layer (14) for attaching to abrasive article, wherein the moisture barrier comprises polyurethane.

Claim Rejections - 35 USC § 103(a)

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3,6,7-11 rejected under 35 U.S.C. 103(a) as being unpatentable over Manor in view of Chelsey et al.-5,785,784.

Manor does not disclose the backing material being vulcanized fiber board or the adhesive being a hot melt adhesive. However, Manor discloses using wood, fiberglass, epoxy, or impregnated canvas materials for the backing material. It would have been an obvious design choice to use material of vulcanized fiber board since these products would perform equally well and Manor discloses that the thickness can be increased or decreased to attain the desired strength and flexibility. In addition, to use a hot melt adhesive would have been an obvious to one of ordinary skill in the art at time invention was made since any known adhesive capable of performing the necessary attachment would perform equally well and as taught by Chelsey (col. 8, line 43) to be sufficient bonding for hooking stems to be attached to a second major surface.
